

MMO Reference Electrode Datasheet

- Reference Electrode: Mixed Metal Oxide Model:
- Model: MMO

Specification

Element Type:

High purity titanium ASTM B348 Grade 1 with mixed metal oxide iridium based coatings

Potential:

Variable depending on the environment and pH dependent.

Drift:

less 3mV in 24 hours.

Dimensions:

75mm long x 6.35mm diameter

Cable:

4mm² or 2.5mm² rubber sheathed cable supplied by Lapp Cables product No. H07RN-F. These tough flexible rubber sheathed cables are ideal for wet conditions

Expected life: More than 50 years. The function life of the electrode will most likely be determined by the life of the associated cables.
